What is the Mosaic Performance Framework?

The Mosaic Performance Framework is a research-based model created to help leaders understand the dynamic tensions that exist within their teams and organizations. It consists of a variety of individual, team, and organizational assessments that help to quantify many of the behaviors, values, and norms that drive sustainable performance.

What is the Culture Mosaic?

The multitude of dynamic tensions that exist within an organization can be extremely difficult to manage. Those organizations that are best able to manage these dynamics, and many times, competing tensions are those that are best equipped to survive and thrive over the long-term.

Culture Mosaic is an assessment tool that allows leaders to obtain specific input from their teams in areas of organizational functioning that have been proven to drive organizational performance. The items assessed in the Culture Mosaic have been empirically linked to organizational performance and provide the ability to quantify an organization’s ability to manage the complex dynamic tensions that exist within every organization. Is it Right for Us?

Culture Mosaic is designed to provide detailed feedback on the key aspects of organizational functioning that drive long-term performance. If you are invested in understanding how your organization can create clarity and alignment around how work gets done in support of your strategy, the Culture Mosaic may be a tool for you.

What You’ll Learn.

Culture Mosaic will provide your organization with specific insight into how your culture and ways of working are supporting, or potentially derailing, your ability to drive performance. It will also help to shed light on areas where you may need to evolve in order to position your organization to thrive moving forward.

We have always used business data to inform our understanding of which facilities were outperforming others. But we had a difficult time understanding why employee engagement data didn’t seem to correspond to the performance data. We knew that the people weren’t happy, but there was no one-size-fits-all approach that we could use to improve the employee experience across all facilities, nor were we able to consistently improve our operations in every facility. It always seemed there was a missing piece. gothamCulture’s Culture Mosaic has helped us understand the rest of the story. The framework showed us why we were seeing the performance metrics we were, and where we needed to focus to deconflict—or even introduce—our dynamic tensions and competing priorities in the organization.
