# Mosaic Performance Framework

Leader and organizational performance are dependent on a multitude of factors— a mosaic—that must be carefully managed, balanced, and adapted to best meet the challenges presented both in the external environment and internal context.

Founded in the theoretical model, the Competing Values Framework<sup>1</sup>, the Mosaic Performance Framework provides organizations with the ability to understand how their culture, leadership, and workforce capability create a dynamic that either supports or derails their ability to achieve their goals.

Each mosaic is comprised of a series of factors, or tiles, that are assessed and managed over time. These tiles have been identified

through exhaustive research over decades and have been shown to be empirically linked to performance.

The Mosaic battery of assessments are designed to be used in conjunction with each other, over time, to provide leaders with the insight they need to proactively shape their performance.

# Mosaic Links to Performance

# WELCOME

to *your* Leadership Mosaic.

The Mosaic Performance Framework is grounded in the belief that achieving and sustaining a high level of performance is dependent on a variety of key behaviors across an organization.

These behaviors, in turn, are driven by the underlying beliefs and assumptions that exist within that organization about "how business should be done".

Each organization, over time, learns to survive and thrive in their own unique operating environment. Through these successes and failures, groups develop a certain philosophy about what

"right" looks like and these ways of doing things have a massive impact on future behavior within the group.

Your Leadership Mosaic, provides you with an in-depth analysis of your organization's maturity on a variety of components that have been empirically linked to sustained organizational performance.
